EXCEL/3

Counter machine for soft ice cream and frozen yoghurt - two flavours

- Thanks to its compact structure and small size, Excel/3 unit is ideal even where space is limited: small bars, kiosks, fast-food and self-service restaurants, pubs, and sandwich bars.

- Excel/3 is a small machine that suits different customer needs, serving single portions of excellent product in two different flavours plus a mixed one.

- The quality and technology of materials guarantee the perfect conservation of the mix. The two stainless steel hoppers are equipped with level gauge LEDs and automatic, adjustable refrigerating systems.

- The mixing cylinders are also in stainless steel (1.7 litres) and they add to the product high quality. With their scraping blades, the whisking action beaters guarantee an ideal production efficiency and a constant quality from the first to the last cone.

- The different functions of the machine are easily controlled through an automatic, electromechanical system.

- The CKC system controls and adjusts the product consistency with precision, whether it be soft ice cream, frozen yoghurt, sorbet or milk-shake.

- Excel/3 unit is available in the gravity or stainless steel pressurizing gear pump version, with air, water or remote cooling system.

- To meet the taste and needs of any client, the machine decoration can be altogether customized.

Technical Data		Gravity	Pump
Flavours		2+mix	2+mix
Hourly Production	kg	20	22
	litres	29	41
	n° of cones	(100 gr) 200	(70 gr) 314
Hoppers	n°	2	2
Capacity	litres	7+7	14+14
Voltage	volts	230/400 V	230/400 V
	cycles	50/60 Hz	50/60 Hz
	phases	1 or 3	1 or 3
Power	Kw	2,3	2,6
Cooling		air/water	air/water
Net Weight	kg	135	150
Dimensions	depth	62	62
	width	50	50
	height	82	87

Low voltage electromechanical control system (24V)
